SHEET METAL INDUSTRIES

January to June 1976

INDEX TO VOLUME No 53

A

Page

Acrow shows its storage systems to steel stockholders 259
An interesting development in press-brake tooling 343

B

Book Reviews:
'Industrial Fasteners Handbook' 216
'Surface Treatment of Aluminium Glossary of Technical Terms' 216
BSC's stainless-steel challenge 7

C

Can production. Tooling aspects of high-speed 331
CD stud welding. The potential of 220
Coiled strip process lines. Some observations on division of responsibility for safety provisions in 289
Coloured stainless is gaining ground 22
Comment of the Month
A non-'base' base metal 77
Many ways to save it 207
'Give us the tools and . . .' 323
Computerised techniques. Materials conservation and improvement in utilisation by 280
Continuous casting of copper-based alloy strip 340
Copper alloys and available forms 90
Copper alloys for component production on the transfer press. The use of 121
Copper and brassware in the home 108
Copper and copper-alloy sheet and strip. Modern production processes for 79
Copper and copper alloys in controls and instrumentation. The uses of 120
Copper and copper alloys. Markets for rolled 86
Copper and its alloys. Finishing of 99
Copper and its alloys. Joining 93
Copper-based alloy strip. Continuous casting of 340
Copper Development Association Members of 77
Copper foil. The manufacture of printed circuits from rolled 110
Copper in hot water 112
Copper in roofing and cladding. The use of 114
Cranfield. High-strength, low alloy steels research at 360

D

Deep drawing. Modern developments in lubrication theory and practice for 294
Design of modern transfer presses. The 275

E

Effect of composition on the plastic anisotropy and strain hardening of 17 per cent chromium stainless steels 26
Effect of the flexing process on internal stress distribution in wide steel strip, and related considerations 269
Electropolishing in a modern plant 38
Engineering aspects of BSC's £multi-million stainless steel expansion scheme 11

F

Fasteners, galvanized 219
Fasteners. Some makers and suppliers of 227
Fastenings as an economic proposition. Quick release 217
Finishing of copper and its alloys 99
Flexing process on internal stress distribution in wide steel strip, and related considerations. The effect of the 269
Foil container production. Some recent developments in 286

G

Galvanized fasteners 219

H

High-strength, low-alloy steels research at Cranfield 360
Hydraulic presses for second-operation work. Using small-capacity 185

I

Institute of Sheet Metal Engineering 68, 127, 189, 250, 305, 375
ISME Midland Branch Dinner 129

J

Joining copper and its alloys 93

L

Low-alloy steels research at Cranfield. High-strength 360
Lubrication theory and practice for deep drawing. Modern developments in 294

M

Major step forward in shape control 346
Manufacture of printed circuits from rolled copper foil 110
Markets for rolled copper and copper alloys 86
Mass production. Tool design aspects of 325
Materials conservation and improvement in utilisation by computerised techniques 280
Meating the hole ! ! 214
Mechanical joining techniques 209
Members of the Resistance Welding Machine section of the Welding Manufacturers' Association 168
Metals and the Motor Car 357
Modern approach to tooling manufacture. A 348
Modern developments in lubrication theory and practice for deep drawing 294
Modern production processes for copper and copper-alloy sheet and strip 79
MTTA president highlights shortage of machine tool order input 69

N

Netherlands approach to press-brake design. The 245
No pre-formed rivets, no drilling. Punch riveting 209

O

Offcuts 188

P

Plant. Electropolishing in a modern 38
Potential of CD stud welding. The 220
Press-brake design. The Netherlands approach to 244
Press-brake tooling. An interesting development in 343
Press tools. Steels for 353
Printed circuits from rolled copper foil. Manufacture of 110

Process engineering procurement problems solved 35
Production Group of Companies' international operations. Stainless steel a significant activity of the 57
Punch riveting—No pre-formed rivets, no drilling 209

Q

Quick-release fastenings as an economic proposition 217

R

Reaping the benefits without owning it 222
Recent developments in foil container production. Some 286
Regional stockholding survey—London & South of England 143
Resistance Welding Machine Section of the Welding Machine Manufacturers' Association 167
Roofing and cladding. The use of copper in 114

S

Safety provisions in coiled strip process lines. Some observations on division of responsibility for. 289
Screws for sheet metal application. Self-tapping 223
Screws. 'Teks' self-drilling 213
Second-operation work. Using small-capacity hydraulic presses for 185
Self tapping screws for sheet metal application 223
Shape control. Major step forward in 346
Sheet Metal News 70, 132, 193, 256, 306, 377
Sheet Metal Plant & Equipment 134, 197, 249, 311, 381
Some makers and suppliers of fasteners 227
Some observations on division of responsibility for safety provisions in coiled strip process lines 289
Stainless is gaining ground 22
Stainless steel a significant activity of the Production Group of Companies' international operations 57
Stainless steel and the fabricator 46
Stainless steel and the sink maker 43
Stainless-steel challenge. BSC's 7
Stainless steel expansion scheme. Engineering aspects of BSC's £multi-million 11
Stainless Steel Fabricators' Association 46
Stainless-steel formability research at BSC's Swinden Laboratories 16
Stainless steel into the 80s. Taking 7
Stainless-steel sheet. Welding 54
Stainless steel stockholding 59
Stainless steels. Effect of composition on the plastic anistropy and strain hardening of 17 per cent chromium 26
Steel Scene. The.
It's All Happening 5
Are consumers getting the message 141
First the good news 267
Steel service centre doubles capacity 345
Steel stockholders. Acrow shows its storage systems to 259
Steels for press tools 353
Stockholders place—one step ahead of demand. The 107
Stockholding & Service Centre News and Equipment 136, 317, 384
Stud welding for economy 215
Stud-welding. The potential of CD 220
Swinden Laboratories. Stainless steel formability at BSC's 16

T

Taking stainless steel into the 80's 7
'Teks' self-drilling screws 213
Tool design aspects of mass production 325
Tooling aspects of high-speed can production 331
Tooling manufacture. A modern approach to 348
Transfer press. The use of copper alloys for component production on the 121
Transfer presses. The design of modern 275

U

Use of copper alloys for component production on the transfer press. The 121
Use of copper in roofing and cladding. The 114
Uses of copper and copper alloys in controls and instrumentation. The 120
Using small-capacity hydraulic presses for second-operation work 185

INDEX TO VOLUME No 53

A

Page

Acrow emphasize importance of correct choice of storage system 38
Alcoa distribution centres 415
Aluminium aids unit-tool design 335
Aluminium and brass sheet. Earing of deep-drawn anisotropic 286
Aluminium demand. Distribution centres meet expanding 315
Aluminium-foil production. Modern 406
Aluminium sheet metal products. Finishes for 397
Aluminium stockholders. Guide to principal 319
Aluminium strip and foil mills. A new process for the separation and recycling of mineral oils from rolling-mill fume with particular reference to 386
Aluminium strip for packaging applications. The pretreatment and lacquering of 297
Aluminium—the key to advanced rail design? 393
Appointments 66, 142
Assembling Creda washing machines by welding 329
Automated production machines. Cost benefits of 370
Automatically forming corrugated sections from superalloy sheets 44

B

Blech 76 Preview of exhibits 336
Book Reviews: 'Corrosion' 108
'European Scrap Directory' 134

C

Car bodies. Vertak—a new surface treatment process for 252
Centenary celebrations 521
Coatings for decoration and protection. Liquid 513
Combined stamping and drawing press and its applications. The 227
Comment of the Month
Looking ahead to '78 91
Forewarned is Forearmed 283
For the industry, by the industry 465
Correct choice of machine. How to save money by 377
Cost benefits of automated production machinery 370
Cost reduction in the press shop. Effective 365
Crank and related presses—practical aspects. Safety of 182

D

Deep drawing and ironing. Tooling for 20
Developments in power press design 204
Distribution centres meet expanding aluminium demand 315
Domestic appliance industry. The role of precoated metal in the 497
D + R machine for two-piece food cans. New 385
Drawbead. Metal flow through a 12

E

Earing of deep-drawn anistropic aluminium and brass sheet 286
Economy. Sheet metal adapts to a new world 306
Effective cost reduction in the press shop 365
Electrical machines. Notching of laminations for rotating 24
Elevated temperatures—a new press design. Sheet-metal forming at 174
Engineering analysis of the redrawing process. An 427
Exploratory investigation into thermo-hydrostatic metalforming. An 48

F

Fabrication and use of pre-finished steel. The 483
Film coatings on strip and sheet. Properties of 525
Fine-blanking meets a pressing economic need 381
Fine-blanking tool system concept. A new universal 41
Finishes for aluminium sheet metal products 397
First results from machine tool merger 234
Foil mills successfully commissioned. New 310
Folding machines. Power 528
Ford, New front-wheel-drive small car from 145
Forming of tubes. Hydraulic 418
Four column under-drive press, equipped with 4-guide pillar subpress. Numerical analysis of 242
Furnaces, Refractories, Heat Treatment and Fuel Economy Exhibition. Preview of Exhibits 323

How to save money by correct choice of machine 377
Hydraulic forming 55
Hydraulic forming of tubes 418

I

Institute of sheet Metal Engineering 65, 146, 249, 331, 441, 532
Ireland sells process engineering to UK and European markets 130
Ireland. Some comments on stockholding in 448
Ironing. Tooling for deep drawing and 20

L

Laminations for rotating electrical machines. Notching of 24
Letter to the Editor
'Is die handling being neglected?' 64
'Lightscreen' press-brake guards. Mute programme unit 46
Liquid coatings for decoration and protection 513

M

Mach '76 Preview 92
Machine tool merger. First results from 234
Metal coating of strip 519
Metal flow through a drawbead 12
Metal sawing today 125
Midland Dinner Dance ISME 534
Mineral oils from rolling-mill fume with particular reference to aluminium strip and foil mills. A new process for the separation and recycling of 386
Modern aluminium-foil production 406
Mute program unit—a new adjunct to 'Lightscreen' press-brake guards 46

N

New D + R machine for two-piece food cans 385
New foil mills successfully commissioned 310
New front-wheel-drive small car from Ford 145
New managing director for Wemex 62
New press design. Sheet-metal forming at elevated temperatures—A 174
New process for the separation and recycling of mineral oils from rolling-mill fume with particular reference to aluminium strip and foil mills 386
New universal fine-blanking tool system concept. A 41
Nitrogen die springs—37 years of problem solving in metal forming 414
Notching of laminations for rotating electrical machines 24
Numerical analysis of four column under-drive press, equipped with 4-guide pillar subpress 242

O

One man's view. Working Weekend October 16-17 444

P

Paint lines. Strip guiding on processing lines with particular reference to 500
Partitioning production. Pre-primed steel for 511
Plastic deformation of tinplate in can manufacturing 137
Power folding machines 528
Power press design. Developments in 204
Pre-coated galvanized sheet, its development and use 507
Precoated metal in the domestic appliance industry. The role of 497
Precoating and recoating service for the smaller user 479

Pre-finished metal. A review of the benefits of 492
Pre-finished steel. The fabrication and use of 483
Pre-plated metals. Some notes on the forming of 520
Pre-primed steel for partitioning production 511
Press brake conversion 223
Press shop. Cost reduction in the 365
Pressing economic need. Fine-blanking meets a 381
Pretreatment and lacquering of aluminium strip for packaging applications. The 297
Process engineering to UK and European markets. Ireland sells 130
Processing lines with particular reference to paint lines. Strip guiding on 500
Production machinery. Cost benefits of automated 370
Properties of film coatings on strip and sheet 525
